

SECURITY DOOR CERTIFIED CLASS 4

STRUCTURE

Carrying structure realized in galvanized steel profile thickness 20/10 mm, integrated by internal horizontal supports realized with tubular tyres 50/60 mm X 2 mm and internal vertical supports in pressure folding sheet thickness 20/10 mm.

Internal and external covering with galvanized steel sheets thickness 20/10 mm.

N. 1 mechanical lock with 3 points of closing.

N. 1 security electropiston.

N. 3 foldaway fasteners.

Security Certification class 4 obtained by getting through the tests provided for the rules UNI ENV 1627/2000, 1628/2000, 1630/2000.

EXTERNAL OVERALL DIMENSIONS:

- Width: 1050mm
- Height: 2185 mm

PASSAGE DIMENSIONS:

- Width: 920 mm
- Height: 2115 mm

WEIGHT

- Weight : 200 Kg

FINISHING

RAL of series 9010.
